#### INTRODUCT

The Statistical Abstract, Rajasthan, 1962 is the 5th issue of the publication with this title. Like previous years, it continues to be a detailed compendium of the important statistical data relating to various facets of the economic and social structure of the State. The reference period is calendar year ending 1961 or the financial year/agricultural year, 1961-62. The data in this publication unless otherwise specified relates to the State of Rajasthan. The pattern followed in presenting the tables is the same as in the previous issues, where figures for the State have been given for the preceding 5 years as far as possible, while districtwise break-downs have been given for the reference period of Abstract. Constant attempt is made to improve the coverage and presentation of data, as such, in the current issue a few new tables have been incorporated and presentation in respect of a few others improved. Two tables have been deleted as they were not up-to-date. The source of information quoted at the foot of the tables indicates either the earlier published source from which the data has been abstracted or the source of supply of information, if the data has not been published earlier. With this issue we have completely switched over to the metric system of weights and measures.

It has been possible to bring out this publication with the active cooperation of the various Departments of the Government and for the assistance rendered in the supply of the material required for the preparation of this Abstract, we are grateful to them. It shall much facilitate the improvement of the future editions of this publication if the Heads of Departments go through the tables relating to them and suggest improvements. We shall also look forward for constructive suggestions from the readers who are also requested to indicate their needs of detailed statistical data which cannot be met from this publication so that we could endeavour in our future editions to include such data.

#### THE METRIC SYSTEM

#### C. Units for Wholesale Transaction of Commodities.

Commodity	Metric Unit
(1) Gold	Gram (g)
(2) (i) Grocery (Cardemoms, pickles and jams. dry mangoes)	
(ii) Confectionery (Biscuits, sweet meats)	
(iii) Textiles and Textile Fibres (Cotton, yarn, damaged and second cloth feats, rags, chindles etc. raw silk, rayon, silk yarn, raw wool, wool manufactures (when sold by weight)	Transaction (Trans
(iv) Paints and Chemicals (Paint, if sold by weight, indigo, liquid chlorine)	Kilogram (Kg.)
(v) Hides, Skin and Leather (Raw hides, leather hides and skins)	
(vi) Metals (Silver, aluminium sheets, strips and circles, copper and brass wires and utensils)	
(vii) Miscellaneous (Tea, meat, camphor tablets, senna leaves and mica)	
(3) (i) Grains and Pulses (Rice, wheat, bajra, jowar, arhar, moong, masur, gram)	
(ii) Spices (Black pepper, mustard, chillies, cloves, dhania, dalchini, malethi, turmeric, betchuts, dry ginger)	
(iii) Plantation Products (Coffee, rubber, cashewnuts, cashew, kerneis, tobacco (raw and manufactured)	
(iv) Forest Products (Lac and lac products, gum benjamine and gum arabic, myrobalans, galnuts, soapnuts, avaram bark, konnam bark)	
(v) Toxtile and Textile Fibres (Raw cotton, raw jute, raw hemp, coir year)	
(vi) Oil. Oilseeds and Oilcakes(Vegetable oils like ground nut, linseed, castor, gingelly, mustard, coconut etc., oilseeds like groundnut, gingelly rapeseed, copra etc., groundnut cake, castor cake, sesamum cake, coconut cake)	
(vii) Miscellaneous (Sugarcane, vegetables, tamarind, garlic)	
(viii) Non-Ferrous Metals (Aluminium ingots, bars, blocks, slabs, billets)	
(ix) Lead (Ingots, sheets and strips)	
<ul><li>(x) Copper (Ingots, blooms, slabs, cakes, tiles, bricks, blisterbars and wirebars, rods, sections and pipes, sheets and strips, circles)</li></ul>	
(ri) Brass (Ingots, rods, sections, pipos, sheets, strips, circles)	
(xii) Zinc (Ingots, sheets, strips)	
(xiii) Tin (Blocks)	
(xiv) Chemicals (Caustic soda, bleaching powder, glycerine, soaps, paper, salt)	
(xv) Others (Sugar, gur, ice, fish etc.)	Quintal (q) (100 kilograms)
(4) (i) Minerals (Iron ore, manganese ore, boxite, coal)	
(ii) Iron and steel (Pig iron and steel manufactures), semis (billets for re-rolling etc.)	Metrie tonne (1000 kilograms)
(5) Cotton cloth (mill and handloom), silk and rayon manufactures, woollen cloth	Metre (m)
(6) Jute carpets, coir mats and mattings, sheet glass etc	Square metre (m 2)
(7) Timber Cubic metre	(m 3)
(8) Paints (when sold by measure), spirits	Litre (l)

#### THE METRIC SYSTEM

### D. Units For retail Transaction of Commodities

Commodity	Metric Unit
(i) Foodgrains, pulses and spices. vanaspati oils, ghee, fruits, vegetables, meat, fish and sweets, tea, coffee, sugar, salt, bread, etc.	Kilogram (kg.)
(ii) Vanaspati Oil, Milk (when sold by measure) etc.	Litre (1) Metre (m)
(iv) Packed materials	Preferably size corresponding to commercial weights and measures prescribed.

Source: Data compiled from various sources.

Note—All footnotes given in table 1.2 apply to this table also.

\*For these items relative numbers have been worked out for other States taking Rajasthan=100.

#### AREA & POPULATIO

Area.—Two sets of area figures have been given; one based on Surveyor General of India and the other on milicate papers. There is slight difference between two sets of figures, which is accountable to the difference in methodology of Surveying, the coverage of area surveyed and the allowances made for land under water, building, etc. in the two sets of figures.

The area according to the Surveyor General of India and the population figures for 1951 and preceding years are based on the Census reports and have been adjusted for the re-organised Rajasthan. Wherever, the figures for Sunel Tappa enclave, Abu Taluka and Sironj Sub-divisions were not available for 1951 and earlier periods, they have estimated as follows:—

- (i) Sunel Tappa enclave—Figures have been calculated from the District Census Hand Book of Mandsore district of former Madhya Bharat State on the basis of the list of villages that were transferred to Rajasthan and the population was classified under various categories in these villages in proportion to the classification of the population of Mandsore district.
- (ii) Abu Taluka—Figures have been extracted out from the District Census Hand Book of Banaskantha district of former Bombay State and wherever necessary, have been estimated in proportion to the population of Banaskantha District.
- (iii) Sironj Sub-Division—Figures have been estimated in proportion to the figures of Kota district wherever these were not available directly from the District Census Hand Book of Kota district.

Village.—A village means a revenue Mauza whose Revenue is realised under a separate name. It includes all hamlets attached to it.

3.7

Town.—Those places have been considered as towns which have municipalities or have a population of noteless than 5000, a density of not less than 1000 persons per sq. mile and at least three-fourth of their adult male population employed in pursuits other than agriculture.

City.—A city is defined as a town with a population of 1,00,000 or over.

7.6

Area & Population by Tehsils.—Area figures according to the village papers are for the year 1960-61 and have been supplied by the Board of Revenue (Land Records), Rajas han. In the table on 'Area and Population' by Tehsils area & population figures have been adjusted as per re-organisation of Tehsils in September, 1962.

Mean decennial growth rate has been worked out as follows:-

162.2

121.7

Growth of population during the decade

Population at the end of the decade.

118.9

Urban areas.—All places which have been administered by municipalities ever since 1951 have been included in the urban area together with new area having the following three characteristics:—

(i) The population is at least 5000,

1./-- -310

- (ii) Three-fourth of the Adult male population is engaged in non-agricultural occupations; and
- (iii) The density of population approximates 1000 persons per square mile.

Scheduled castes and Scheduled Tribes—These are the eastes declared as scheduled castes and scheduled tribes by the President of India, under Constitution from time to time. The figures given in the table are based on 1961 Census.

In the 1951 Census, the population was divided according to livelihood, into two categories viz., (i) Agricultural occupations and (ii) Non-agricultural occupations, while in the 1961 Census, the population has been divided into Workers and non-workers. The worker and non-worker have been defined as follows:—

Worker—Is a person who is actually working in cultivation, household industry or any other industry, profession, trade or service. Work includes not only actual participation in work but effective supervision and direction of work as well. In case of seasonal worker a person having some regular work of more than one hour a day throughout—the greater part of the working season, has also been treated as worker. In case of regular employment, a worker in any trade, profession, service or commerce, even if employed during any of the 15 days preceding the day of enumeration has been treated as worker. A person who was working but was absent from his work during the 15 days preceding the day of enumeration, or even exceeding the period of 15 days due to illness or other causes has been treated as a worker. Persons under training as apprentices with or without stipend or wages have also been treated as workers. An adult woman engaged in household duties, but doing no other active work to augment the family resources, has not been considered as worker. Persons like beggars, pensioners, receivers of agricultural or non-agricultural royalty, rent or dividend who may be earning an income but not participating in any productive work have not been treated as workers unless they also happen—to work in cultivation, industry, trade, profession, business or commerce. A public or social worker, actively engaged in public service or activity or a political worker also actively engaged in furthering the political activities of his party has also been treated as worker.

Non-worker-The following have been treated as non-workers:-

- (i) A student or child attending school, who does no other work, such as to make article at home for sale, nor even help part-time in his town family cultivation, industry, trade or business.
- (ii) A person engaged in unpaid home duties (like housewife or other adult females) who does no other work, such as make articles at home for sale or wages nor help regularly nor even part-time in family cultivation, industry, trade or business.
- (iii) Any dependent including an infant or child not attending school, a person permanently disabled from work because of illness or old age.
- (iv) A retired person who is not employed again, rentier person living on agricultural or non-agricultural royalty, rent or dividend or any other person of independent means for securing which he does not have to work and who does no other work.
- (v) A beggar, vagrant or independent woman without indication of sources of income and others of unspecified source of existence.
- (vi) A convict in Jail (under-trial prisoner has been shown as a worker if he used to work before he was apprehended) or an inmate of a penal, mental or charitable institution.
- (vii) A person who has not been employed before but is seeking employment for the first time.
- (viii) A person employed before but now out of employment and seeking employment.

The following are the nine categories of workers :-

(i) Cultivators.

- (ii) Agricultural Labours.
- (iii) In Mining quarrying, Livestock, Forest, Fisheries, Hunting & Plantation.
- (iv) In Household Industry.
- (v) In Manufacturing of other than Household Industry.
- (vi) In Construction.
- (vii) In Trade and Commerce.
- (viii) In Transport Storage and Communication.
- (ix) In Other Services.

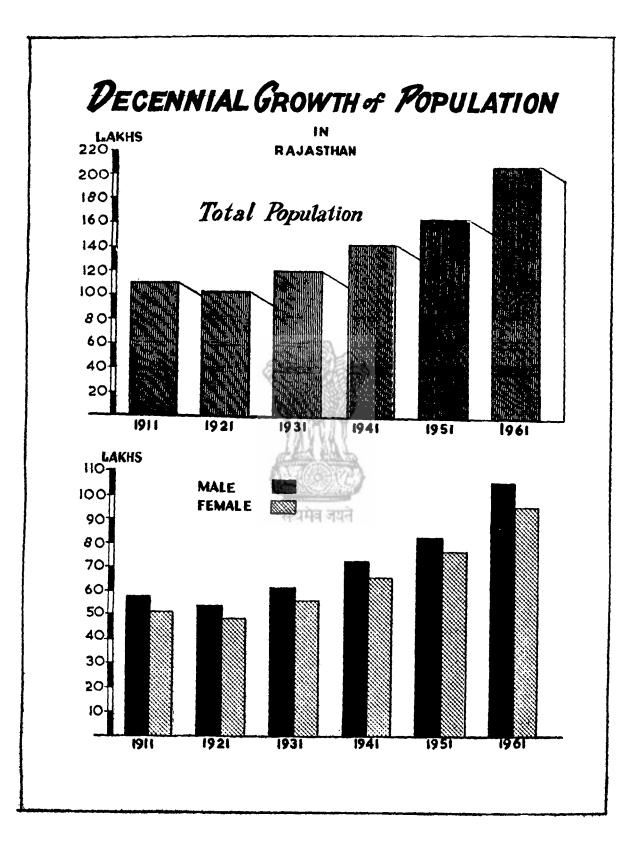

Out of these, a few are defined as follows, the remaining are self explanatory:-

Cultivators—A person is considered cultivator if he or she is engaged either as employer, single worker or family worker in (a) Cultivation of land or supervision or direction of cultivation of land owned or held from Government and (b) cultivation of land held from private persons or institutions for payment in money, kind or share. Cultivation involves ploughing, sowing and harvesting and does not include fruit growing or keeping orchards or groves or working tor plantations like tea, coffee, rubber, cinchona and other medicinal plantations. A person who has given out his land to another person for cultivation for money, kind or share of crop and who does not even supervise or direct cultivation of land, has not been treated as cultivator. Similarly, a person working in another person's land only as a labourer and he has no right or lease or contract on land, on which he works nor is responsible for taking decision as to which crops to sow and when, or taking the risks of cultivation and is paid wages in cash, kind or share, such as share of the produce (agricultural labourers) has also not been treated as cultivator.

Agricultural Labourer—A person who works in another person's land only as a labourer without exercising any supervision or direction in cultivation for wages in each, kind or share such as share of produce, is referred as agricultural labourer. The labourer should have no right or lease or contract on land on which he works nor should be responsible for taking decisions as to which crops to sew and when or taking the risks of cultivation. A share of the produce goes to him only as wages.

सत्यमव जयत

Household Industry—is an industry conducted by the head of the household himself and/or mainly by members of the household at home or within the village in rural areas, and only at home in urban areas. The industry should not be run on the scale of a registered factory but may use machinery and employ power like steam or oil engine or electricity to drive the machinery. The participation of the Head of the household and/or members of the household is an essential feature of the Household Industry. They should be in a position to lend a hand in the industry whenever they find time in the course of their daily chores. Hired workers may be engaged from outside in such industry but their role should be only of secondary importance. In a rural area the household industry can be located either at home or within the village but in urban area, the household industry or at least the major part of its work must be located only at home. Such industry should relate to production, processing, servicing or repairing and includes making and selling of goods but should not be confined simply to buying and selling. At least part of the goods offered for sale from the household industry should be manufactured or processed by members of the household. The household industry does not include professions such as of pleader, of doctor, or barber or waterman or astrologer, etc.

#### CLIMATE

Temperature:—Observations of temperature of air in shed are recorded at most of the observatories twice a day at 0830 and 1730 hours IST. For this purpose thermometers are installed at a height of 4 feet above the ground in Stevenson Screens which provided free access to the air but, at the same time protect the thermometers from direct rays of the sun.

Humidity:—Relative humidity is the measure of water vapours present in the atmosphere relative to the corresponding amount for saturation. It is recorded at the principal observatories by standard record at 0830 and 1730 hours IST.

The temperature and humidity data has been complied from the daily bulletin issued by the Meteorological Department, Government of India.

Rainfall.—Actual rainfall is recorded at the stations at 0830 IST every day. The amount measured gives the rainfall of the previous 24 hours and the data is tabulated by the Board of Revenue (Land Records), Rajasthan. To arrive at the figures in inches, the given figures (in Cms.) may be divided by 2.54.

Normal Annual rainfall is the average of rainfall data for the past 10 years and was last worked out for each district headquarter in the year 1950.

#### AGRICULTURE

Land Utilisation.—The main purpose of the table on Land Utilisation is to indicate broadly the ways in which the land of the State is utilised. The classification of area was formerly available under five classes, which have recently been amplified to fall in line with standard classification as laid down by the Ministry of Food and Agriculture, Government of India.

Geographical area.—Area according to Surveyor General of India (professional survey) is calculated in the office of the Surveyor General of India and area according to village papers is based on the returns of area estimates prepared by the Revenue Staff of the State. There is a slight difference between these two sets of figures as pointed out in the note to Section 2 (Area and Population) because of the different methods by which they are collected and also because some areas are unsurveyed.

Forests.—The area shown under forests in the table on Land Utilisation does not tally with that given in table under the head "Forest" because (i) the Forest Department reports forests worked out by the Forest Department while the table on Agricultural Statistics include in addition, forest area administered by district officers and (ii) certain villages and other lands not covered by forest but worked out by Forest Department are not treated as forests in the returns of Agricultural Statistics.

Area not available for cultivation.—This stands for all land which is absolutely barren or un-cultivable covered by buildings, water or roads or otherwise appropriated for non-agricultural purposes. Under sub-head "Land put to non-agricultural use" is included land occupied by buildings, roads, railways or under water and other lands put to uses other than agriculture while under the sub-head "Barren and unculturable land" come mountains, deserts etc.

Other uncultivated land excluding fallow land.—This denotes land available for cultivation—but—not taken up and includes culturable waste, permanent pastures and other grazing land and land under miscellaneous tree crops and groves. The last—one is that type of culturable land which is not included—under net area sown but is put to some agricultural use.

Fallow Land.—It includes current fallow i.e. land which is left fallow during the current year only and other fallow lands i.e. land which were taken up for cultivation but are temporarily out of cultivation for a period of not less than one year and not more than 5 years.

Net area sown, area sown more than once and total cropped area.—In computing the net area sown, areas sown more than once have been counted only once. Under the head "area sown more than once" area sown with two and more than two crops in same year is counted as many times as the crop is sown. The total cropped area is the total of net area sown and area sown more than once.

Area and production of crops.—The figures of area and production are given for principal cercals pulses and commercial crops. The area figures are compiled by the Board of Revenue (Land Records). Rajasthan, from the Agricultural Statistics returns prepared by the revenue staff. While the production figures for the State as a whole are estimated on the basis of crop-cutting experiment results for Bajra, Jowar, Maize, Wheat, Barley, Gram, Linseed, Sesamum, Rape and Mustard and Cotton. For other crops,

it is calculated on the basis of average normal yield of past 10 years. For estimating the production at the district level, yield is worked out separately for each of the major districts, depending upon different crops and for the remaining districts the estimates are only tentative. The total of the districts tallies with the production for the State as a whole.

The figures as given are those based on final forecast, as well as those based on revised estimates as issued from time to time along with the final forecast for the following year. The data related to the agricultural year ending June.

Average yield of principal crops.—It has been calculated by dividing production figures by area both figures being based on revised final estimates.

Agricultural Implements and Machinery.—The figures relate to the agricultural implements and machinery in actual use as reported by the Revenue Staff in the Agricultural Statistics Returns for the year 1956-57 to 1959-60 and for 1955-56 and 1960-61 as recorded in the Quinqueninal Livestock Census 1956 and 1961 respectively. The data in compiled form is supplied to this Directorate by the Board of Revenue (Land Records,) Rajasthan.

#### INDEX NUMBERS:-

Coverage.—The present series of Index Numbers of Agricultural production in Rajasthan covers 22 principal crops for which forecasts are issued by the Board of Revenue from time to time. These crops occupy 80.69 per cent of the gross area sown in the State. These 22 crops are further sub-divided into two main groups, namely, food-grains and non-food-grains and five sub-groups, namely, cereals, pulses, oil seeds, fibres and miscellaneous.

Subject to the availablity of reliable data, the scope will be extended to other crops and live-stock products not covered at present. The data about the crops included in the present series pertains to the reorganised State of Rajasthan. As the area under the crops included for the preparation of the Index covers 80.69 per cent of the gross area sown, the trends, in their production are fairly representative of the trend of the entire agricultural production in the State.

Base Period.—Although the year 1949-50 has been adopted as the base year in the case of All India Index, the political and economic backgrounds of formation of Rajasthan State completely ruled out the possibility of adoption of the same year as the base in the case of this State. An examination of the acreage and yield figures revealed that variation in them from year to year were so marked as to give the feeling that no single year could be adopted as the base year and that instead, an average of a number of years should be taken as the base. An examination of the annual rainfall and production data further revealed that agricultural production in Rajasthan is subject to cyclical fluctuation, each cycle extending over a period of four years. Since 1952-53 was observed to be a normal year in respect of both production and prices as also in respect of the changes in the extent of reporting area, the four year period commencing from 1952-53, 1955-56 was adopted as the base period.

Method of construction of Index Numbers. To make year to year figures of production of as publised in the "Crop Estimate" comparable, the adjustment for changes in coverage has been effected with the help of the area figures reported in the Annual Agricultural Statistics Returns and the yield figures reported in the "revised estimates" Since the reporting area will be increasing with the resumption of Jagirs in the State, one assumption has been made uniformly that the variation in production in the non-reporting area is the same as that in the reporting areas in the aggregate. To provide for the changes in

the area and yield figures due to consequent extension in geographical coverage, the index numbers have been constructed by the chain base method.

For each crop, the estimated production during a year has been expressed as a production relative with the corresponding estimated production in the preceding year as base. These production relatives for each crop have been linked with that of the year through intervening chain relatives to give the production indices for that crop. The weighted arithmetic average of these production indices has been taken to represent the sub-group, the group and all commedity index numbers.

Weights.—Weights have been assigned to the different commodities in the same proportion, which the average value of its production bears to the total average value of production of all commodities during the base period. The production has been valued at the annual harvest prices of the commodities prevailing each year during the base period.

The concept of production utilised in the construction of index numbers is that of gross production of crops. Revised estimates of yield for each year have further been processed as indicated in Section III above to get the estimated yield for which figures have been used for construction of the index numbers.

<sup>†</sup> Provisional (Based on Livestock Census, 1961).

#### **FORFSTS**

The area of forests presented here is as reported by the Forest Department of the State. The break up of the area under forests is given as "reserved" "protected" and "unclassed". Reserved forest is one which is permanently dedicated either to the production of timber or other forest produce and in which right of grazing and cultivation is seldom allowed. In protected forests these rights are allowed subject to a few mild restrictions. Unclassed forests consist largely of inaccessible forest or unoccupied waste. The total forest area presented in this table does not tally with the one reported in the table on land utilisation as there is a difference of concept. Also this area is varying from year to year as forest demarcation and settlement operations are still in progress. The forest statistics are reported for the administrative divisions of the Forest Department and not for revenue divisions/districts.

Forest produce is classified as major produce and minor produce. The value of outturn relates to the products removed or utilised.

## IRRIGATION

Net irrigated area.—The total area irrigated from different sources represents net irrigated area. If two or more crops are irrigated in the same year from the same source, the area is counted only once.

Gross irrigated area.—Total area irrigated under different crops represents Gross irrigated area and includes area irrigated under more than one crop during the same year. Area irrigated more than once in a single harvest is counted only once.

The data on irrigation by sources and crops is compiled by the Board of Revenue (Land Records), Rajasthan from the data contained in the Annual Agricultural Statistics Returns prepared by the Revenue staff. The information relating to irrigation works under Third Five Year Plan is supplied by the Irrigation Department, Rajasthan. The data contained in table No. 6.1 relates to only plan works in Progress.

# LIVESTOCK AND POULTRY

The data on livestock and poultry given in column 6 are based on Quinquennial Livestock Census 1961 and the data given in the intervening Columns are for respective agricultural years based on the agricultural statistics returns prepared by the Revenue staff and compiled by the Board of Revenue (Land Records), Rajasthan.

The data on Animal Husbandry facilities is supplied by the Animal Husbandry Department, Rajasthan where it is collected as an administrative by-product.

#### MINING

The mineral statistics are collected and compiled by the Directorate of Mines and Geology, Rajasthan. To supply the data in case of major and minor minerals is a statutory obligation on the part of the lessees, but in case of certain minor minerals and especially building materials, where rent cum-royalty leases are granted, the production, sale value and average number of persons employed per day are estimated on the basis of royalty collected through royalty collection contractors. The data in tables has been compiled for the administrative divisions districts of the Directorate of Mines and Geology, which vary from the revenue districts.

#### INDUSTRY

Factory:—Under the Indian Factories Act, 1948 a factory means any premises including the precincts thereof—

- (i) Wherein ten or more workers are working or were working on any day of the preceding 12 months and in any part of which a manufacturing process is being carried on with the aid of power or is ordinarily so carried on, or
- (ii) Whereon twenty or more workers are working or were working on any day of the preceding 12 months and in any part of which manufacturing process is being carried on without the aid of power or is ordinarily so carried on,

but does not include a mine subject to the operation of the Mines Act, 1952 (XXXV of 1952), or a railway running shed.

Such factories are registered under section 2 (m) of the Indian Factories Act, 1948.

Besides these, (a) The State Government may, by notification in the official Gazette, declare that all or any of the provisions of this Act shall apply to any place wherein a manufacturing process is carried on with or without the aid of power or is so ordinarily carried on, notwithstanding that—

- (i) The number of persons employed therein is less than ten, if working with the aid of power and less than 20, if working without the aid of power, or
- (ii) the persons working therein are not employed by the owner thereof but are working with the permission of or under agreement with such owner:

Provided that this manufacturing process is not being carried on by the owner only with the aid of his family.

(b) After a place is so declared, it shall be deemed to be a factory for the purpose of this Act, and the owner shall be deemed to be the occupier and any person working therein a worker.

In Rajasthan, factories carrying on any of the following manufacturing processes, viz., (i) Saw Mills (ii) Tobacco products, (iii) Printing (Including lithographing) and book binding and (iv) Wool cleaning and pressing, and not falling within section 2(m), are covered under section 85 of the Indian Factories Act, 1948 Registration of Factories under section 85 was started since the year 1956.

The data is based on the information supplied by the Chief Inspector of Factories and Boilers, Rajasthan.

Financial assistance to industries:—The State Government is financing large and medium industries through the Rajasthan Financial Corporation, Khadi and Village Industries, through the Rajasthan Khadi and Village Industries Board and Small Scale Industries i.e. factories with a capital of less than Rs. 5 lacs, through the Directorate of Industries and Supplies. The Khadi and Village Industries are also getting aid from the All India Khadi and Village Industries Commission, but mostly through the Rajasthan Khadi and Village Industries Board. The amount of assistance which some of the institutions are getting directly from the All India Khadi and Village Industries Commission are also included under Table 9.3.

Census of Manufacturing Industries:—All the factories registered under section 2 (m) of the Indian Factories Act, 1948 are grouped into 63 groups and factories falling under first 29 groups of industries and employing 20 or more

workers and using power were covered under this census till 1956 on statutory basis but thereafter on voluntary basis till 1958, due to the repeal of the Industrial Statistics Act, 1942 by the Collection of Statistics Act, 1953.

This work was transferred in 1957 from the Directorate of Industries and Supplies, Rajasthan, to the Directorate of Economics and Statistics, Rajasthan when, the Director of Economics and Statistics, Rajasthan was declared as the Statistics Authority under the Collection of Statistics Act, 1953. During the year 1958 the scope of the census was enlarged and all the covered under voluntary census. The returns were scrutinised and data compiled after rectification of defects, if any, in this Directorate and the broad results have been presented in this issue.

The following are the important definitions and concepts used for this census.

Productive capital:—It includes both fixed and working capital, fixed capital being that capital which is invested in the factory itself and is comprised of land, building, plant and machinery and other equipments, etc., while the working capital is invested to run the factory and comprises of the stock of raw material, semi-finished goods, cash in hand and at bank etc., but excludes fixed deposits or current credits. The reference date for all particulars under this head is 31st December, '60 or the last closing date of accounts, except in case of sugar industry the particulars of which are as on 30th June, 1961.

Worker:—As defined under section 2 (1) of the Indian Factories Act, 1948, a worker means a person employed directly or through any agency, whether for wages or not, in any manufacturing process, or in clearing any part of the machinery or premise used for a manufacturing process, or in any other kind of work incidental to or connected with the manufacturing process, or the subject of the manufacturing process.

Persons other than workers:—This head includes persons employed in administrative and clerical jobs within the factory area and all those engaged in effecting delivery of the output.

The average daily employment has been worked out by dividing the aggregate number in attendance on all working days by total number of working days during the year. Daily attendance is the aggregate of attendance in all shifts. Days on which the factory was closed for whatever cause have not been treated as working days.

सरमध्य जगर

Wages:—The term wages is used in the same sense as defined in section 2 (vi) of the Payment of Wages Act, 1936 and denotes all remunerations capable of being expressed in terms of money which would if the terms of contract of employment express or implied, were fulfilled be payable whether conditionally upon the regular attendance, good work or conduct or behaviour of the persons employed or otherwise to a person employed in respect of his employment or of work done in such employment and includes any bonus or other additional remuneration of the nature aforesaid which would be so payable, and any sum payable to such person by reason of the termination his employment, but does not includes:—

- (a) the value of any house, accommodation, supply of light, water, medical attendance or other amenity for any services specifically excluded by general or special order of the State Governments,
- (b) any contribution paid by the employer to any pension fund or provident fund,
- (c) any travelling allowance or the value of any travelling concession,
- (d) any sum paid to the persons employed to defray special expenses entailed on him by the nature of his employment,
- (c) or any gratuity payable on discharge.

Other benefits:—These include various benefits over and above wages such as free or subsidised housing, foodgrains at concessional rates etc.

Ex-factory purchase value of fuels and raw materials consumed:—This is the purchase value of fuels and raw materials consumed in the factory and includes the purchase price, transportation charges and other incidental costs like payment of commission to agents etc. The value of fuels or materials manufactured within the factory and consumed for further processing has not been accounted for. The value of semi-finished goods at the beginning of the bear has been included in it.

Value of work done by other concerns:—This term denotes the cost of services rendered to the factory by other concerns and by individuals other than its own employees.

Depreciation:—Depreciation on fixed assets is calculated at the rates allowed by the Income-Tax authorities for assessing taxable income.

Ex-factory selling value of products and by-products:—This represents the value of products and by-products of the factory and is exclusive of transport charges from the factory, commission to selling agents etc. This term includes all products made during the year for sale (whether actually sold during the year or not). The value of semi-finished goods at the end of the year has also been included in it.

Value of work done for others:—This means value of work done by the factory for others on payment when the materials are supplied by them.

Value added by Manufacture:—This represents that part of the value of the products which is created in the process of manufacturing and is calculated by substracting the ex-factory purchase value of fuel and raw materials, value of work done by other and depreciation on fixed assets from the ex-factory selling value of products and value of work done for others.

All the data refer to calendar year except in case of sugar industry which refer to the year ending June in the year.

Textile Industry:—Data on Textile industry (Mills sector) has been extracted out mostly from the "Indian Textile Industry Journal" brought out by the Textile Commissioner, Government of India. The information therein is based on statutory returns obtained under Cotton Textile (Control) Order, 1948.

Industrial production:—In most cases data has been compiled in the Directorate of Economics and Statistsic from the returns received under Census of Manufacturing Industries and where obtained directly a foot-note has been given. The smaller units have been left out and to that extent there is an omission in the data.

### POWER

The data on generation and consumption of electricity relates to both the private and public undertakings in the State and excludes Military. Factory and Railway power stations. Electricity generated covers the total power generation in the State through Steam/Gas and diesel and Electricity purchased covers both from non-electric utilities and hydel power from adjoining States.

The Statistics are compiled in the Directorate of Economics and Statistics, Rajasthan from the monthly return G. 9-A received from the Central Water and Power Commission, Government of India, Simla. The data on State owned power houses is obtained from Rajasthan State Electricity Board.

### TRADE

The trade statistics give quantity (generally net weight i. e. exclusive of packing) of certain commodities exported from the State of Rajasthan to other States and imported from other States into Rajasthan. Data relate to river and rail borne trade only and are presented for the financial year (April to March). The figures are compiled by the Director General of Commercial Intelligence and Statistics, Ministry of Commerce and Industry, Government of India. Calcutta, and are published in the 'Accounts Relating to the Inland (Rail and River borne) Trade of India.'

These statistics are recorded on "Import basis". According to the arrangement in force, each of the Railways register such traffic en-route to a destination on a different railway station or to a station on the same system but located outside the trade blocks. The imports into the station on the minor railways are recorded by the major railways connect ing them. The traffic carried partly by rail and partly by river, when booked through and carried by steamers running in connection with railways, is to be recorded generally by the railway administration concerned.

#### PRICES

Consumer's Price Index Numbers for Working Classes (Ajmer and Beawar):—These indices relate only to working class families of Ajmer and Beawar. These represent change in the cost of a given basket of goods and services consumed by an average working class household. The items in the list of articles are grouped under five heads viz., food, fuel and lighting, clothing, bedding and footwear, house rent and miscellaneous and separate indices are worked out for individual groups. These are worked out and supplied by the Director, Labour Bureau, Government of India, Simla. The prices of certain prescribed commodities for this purpose are collected by the Labour Bureau, Simla for these centres of Rajasthan through the agency of this Directorate.

Consumer's Prices Index Numbers for Jaipur (Interim series):—These indices relate to working class familes of Jaipur city. Other details of the indices are the same as those for Ajmer and Beawar centres given above except that both the collection of the prices as well as the compilation of the index numbers is done by the Directorate and the series are based on the family budget inquiry conducted by the State Government in the year 1955-56.

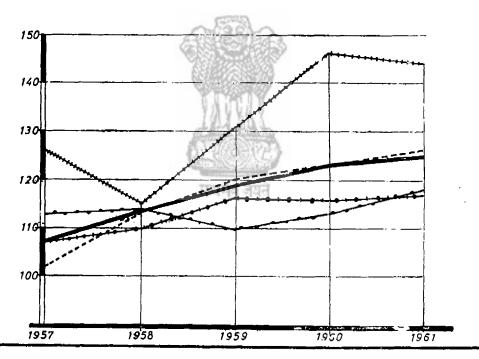

Index Numbers of Wholesale Prices in Rajasthan:—The Directorate of Economics and Statistics has compiled index numbers of wholesale prices for measuring the variations in the price level in the State. It is a general purpose index with year 1952-53 as base. The index is divided into four major groups viz., food articles, industrial raw materials, fuel, power and lubricants and manufactured articles. In all it covers 59 items for which 98 quotations are collected, from 22 centres in the State by the Directorate on every Friday.

Retail prices of food-grains:—Retail prices prevailing at district head-quarters of six food-grains viz., Wheat Barley, Gram, Jowar, Bajra and Maize are supplied by the Secretary, Board of Revenue (Land Records) Rajasthan who in turn-receives these prices from the Collectors of all districts in the State. Rates are quoted in rupees per maund. These monthly averages are simple arithmetic averages of the prices reported at fortnightly intervals.

Spot quotations of bullion:—The prices relate to the spot quotations at Jaipur city. These are collected on every Friday by the Directorate of Economics and Statistics. The average prices is the simple average of the highest and lowest prices. Likewise the monthly averages are also simple arithmetic averages of weekly prices.

Forward quotations of bullion:—These are simple arithmetic average of daily prices of forward transactions in silver for all the working days during the month. Maximum and minimum prices recorded during the month are also given. These prices are collected from Bullion Exchange, Jaipur city by the Directorate of Economics and Statistics.. Rajasthan.

#### CO-OPERATION

Co-operative Society.—The co-operative society here means the society which has been duly registered under the Rajasthan Co-operative Societies Act, 1953.

Share Capital -It denotes the paid up amount.

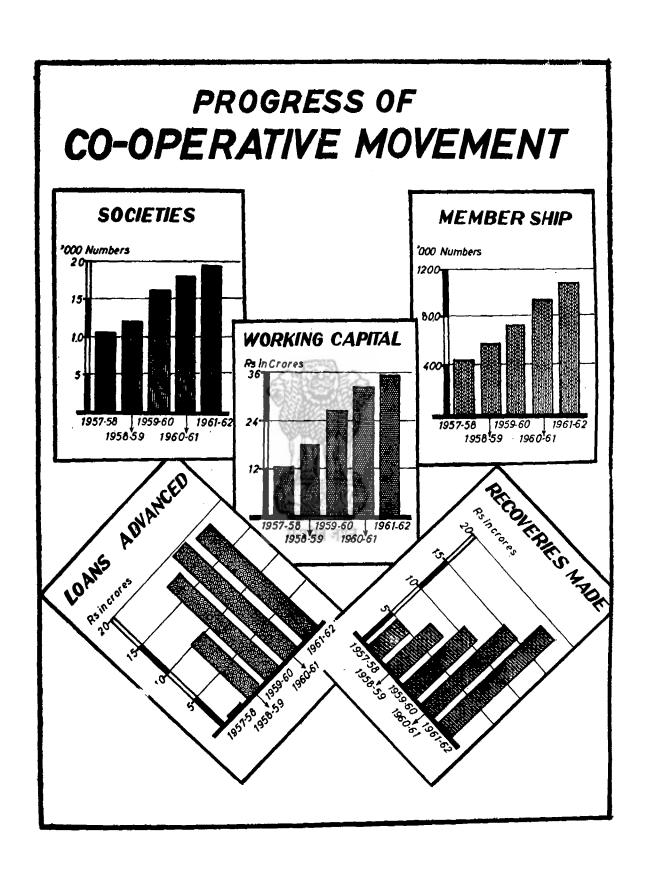

Working Capital.—It includes share capital, deposits, borrowings of land mortgage banks & societies and reserves.

Leans advanced.—These are loans issued to members.

Recoveries.—These are amounts recovered against the loans advanced.

The data relates—to the co-operative year ending 30th June of every year and is supplied by the Registrar, Co-operative Societies, Rajasthan.

#### PUBLIC FINANCE

First 14 tables of this section deal with the Finance of the State Government, both receipts and expenditure. The data in these tables has been culled out from the annual budget volumes published by the Finance Department of the Government of Rajasthan. The figures represent 'the actuals' for the past 4 years and budget estimates & revised estimates for the year 1962-63. All figures relate to the financial year from April to March. The tables have been classified on the basis of independent of economically significant categories viz., the receipts having been classified into tax revenue non-tax revenue and the like. Similarly, the expenditure has been classified into revenue, capital, development and non-development etc.

- 2. The tax revenue of the State can be broadly classified into two important heads i. e. the State Tax Revenues and the Receipts from Centrally Levied Taxes. The important sources of State tax revenue are Land Revenue, State-Excise duties, Sales Tax, and taxes on Motor Vehicles. The receipts from centrally levied taxes represent the share of the State Government of Rajasthan from the divisible pool of Income Tax, Union Excise Duties, and Estate Duty. The share is receivable on the basis of recommendations of the Third Finance Commission. The share of State Government in Income Tax, Union Excise, and Estate Duty amounts to 3.97 percent, 5.93 percent and 4.67 percent of the total divisible pool allotted to the States under the award of Finance Commission. In lieu of Tax on Railway Fare, of the ad hoc grant of Rs. 12.5 erores to the States, Rajasthan's share was placed at Rs. 0.85 erore. A separate table has been given re-classifying these taxes on the basis of incidence of taxation distinguishing between direct and indirect taxes. The non-tax revenue largely consists of receipts from forests, irrigation, multi-purpose river valley projects, civil works and The total revenue expenditure has been broadly classified into development receipts from civil administration etc. and non-development expenditure. The development expenditure has been further classified into expenditure on economic development and expenditure on social services, with a view to present in a concise and consolidated form the progress of the development expenditure on revenue account into these broad categories which are the basic objectives of plans.
- 3. Under the head expenditure on non-development services the items included in direct demands on revenue comprise of the establishment charges for the collection of Land Revenue/State Excise duties, Sales Tax and other important sources of tax revenue. Debt services include the amount of interest paid on public debt.
- 4. The total capital expenditure has also been classified into development and non-development categories. The items included in Government trading under capital expenditure relate to the charges incurred for grain supply schemes, distribution of seeds, fertilisers and implements etc.
- 5. Under permanent debt, the amount shown represents the receipts on account of the public loans floated during the years 1958 and 1959 repayable in 1970 and 1971 and during the years 1960 and 1961 repayable in 1972.
- 6. The public account transactions have been given in a consolidated form showing the total of receipts and disbursements in table 15.14 under the head "Debt, Deposit and Remittance transactions."
- 7. Index numbers have also been given in most of the tables under this section with year 1951-52 as base, to facilitate a ready comparison of the financial transactions of the State Government from the beginning of the first five year plan over years. The indices are simple arithmetic averages.

Land Revenue.—This table presents data concerning estimates of land revenue along with other particulars. Data for the year 1953-54 to 1955-56 relates to pre-reorganised Rajasthan. In districtwise agricultural population administrative changes other than due to State re-organisation in 1956 have not been taken into account. The data

is compiled by the Board of Revenue (Land Records) Rajasthan, on the basis of the Annual Agricultural Statistics returns.

Income Tax.—Statistics presented in tables 15.21 to 15.29 relates to the assessment on account of income-tax super-tax and surcharge made by the Income tax Department, Government of India. The figures refer to regular assessments made under the Income-tax Act and do not include demands raised for advanced payment, provisional assessment and miscellaneous demands like penalties, warrant of fees etc. Figures of taxes represent the demand raised and not the collection actually made against these demands. Those tables analyse the demand for income-tax, super-tax and surcharge according to the class of assessees viz. (1) Individual, (2) Hindu undivided families. (3) Registered firms, (4) Unregistered firms and other associations of persons and (5) Company and other concern assessable at company sale. The statements are designed to show the total tax demand payable by assessees and not income in their hands after the payment of tax. The number of assessees shown are in respect of each source of income and all assessoes having more than one source are shown under each of the source from which he derived his income. The figures for the latest year are presented separately by income ranges. The data has been supplied by the Central Board of Revenue, Government of India.

#### LABOUR

Trade Unions.—Data in table 16.1 relates to trade unions registered and cancelled under the Indian Trade Unions Act, 1926. The statistics in table 16.1 relate to only those trade unions that have submitted returns.

Industrial complaints.—Only the number of complaints, by causes, received in the Labour Department have been reported.

Industrial disputes.—Industrial disputes relate to strikes and lock-outs resulting in stoppage of work involving ten or more workers in all sectors of employment including factories, transport, municipal services etc. Sympathetic strikes and certain other types of stoppages which do not strictly come under the definition of industrial disputes as laid down in the Industrial Disputes Act, 1947 are not covered.

Factory accidents.—Under this head are covered only the accidents occurring in factories (enquired into) which result into either death or injury to a worker necessitating his absence from work for 48 hours or more. This information is collected under the Indian Factories Act, 1948. The data has been compiled in this Directorate from the monthly reports on labour situation issued by the Labour Department, Rajasthan and its Annual Administration Reports.

Manshifts worked.—Number of manshifts worked during the month is obtained by adding together the number of workers who worked on each shift on each day of the month i. c. the total presence of all the workers in the month.

Manshifts lost.—Number of manshifts lost during the month on account of absence is obtained by adding together the number of workers absent on each shift on each day during the month. Manshifts lost by absence due to strike, lock out or employer order lay off are to be excluded.

Manshifts lost through involuntary unemployment.—Number of manshifts lost through involuntary unemployment is obtained by adding together the number of workers who in spite of being on rolls remained unemployed for want of coal, raw materials, break down of mechinery, inadequacy of work etc., on each shift on each working day of the month.

Manshifts lost due to other causes.—Some of the factories which had no proper record of absence of workers due to sickness accident etc. have reported all absences under the head 'other causes'.

Manshifts Scheduled to work.—This is total of manshifts work d and lost.

Absenteeism in factories.—It is the percentage of manshifts lost to manshifts scheduled to work and has been worked out as under:—

The Directorate of Economics and Statistics is collecting quarterly returns on Industrial Statistics, (Labour) on voluntary basis from all the factories registered under section 2 m (i) and (ii) of the Indian Factories Act, 1948.

The returns received from the factories were sorutinised and after rectification of defects, if any, the data on absenteeism was compiled. The individual returns are to be kept confidential and as such no information about any factory has been published unless there are at least three factories in one particular industry.

<sup>\*</sup> Some of the factories have reported manshifts lost under this head only.
+ Includes one unit of the group 'Rubber and Rubber products'.

@Includes one unit of the group 'Electrical appliances'.
Nore: 'Two ordinance factories have not been covered.

#### EMPLOYMENT

This section deals with industrial employment and their earnings, employment in Khadi and Village Industries. Mining and Public Sector, Rajasthan Government Employees and their emoluments and Employment Exchange Statistics relating to Industrial Employment and average daily cash earnings of Industrial workers have been compiled in the Directorate of Economics and Statistics on the basis of returns collected on voluntary basis from the factories registered under section 2 (m) of the Indian Factories Act, 1948. The returns from individual factories are treated as confidential and no figures for any individual factory are presented unless there are at least units in the same industry. Accordingly, one unit of each of the groups, "Rubber products" and "Electrical Appliances" have been included under the groups "Chemicals and Chemical Products" and "Manufacture of Machinery" respectively. Two ordnance factories have been not covered

The figures for average number of workers employed during the last month of the quarter for individual factories have been added up to obtain the total for each industry, Children have been included in the sub-head "women". In the case of Second, Third and Fourth quarters wherever the returns from any individual factories were not available, figures have been estimated on the basis of the returns to the past quarters.

Employment in Mining.—The supply of such data to the Directorate of Mines and Geology, Rajasthan is a statutory obligation on the part of the lessors. But in case of certain minor minerals and especially building materials where rent-cum royalty leases are granted, average number of persons employed per day are just estimated on the basis of royalty collected through royalty collection contracts. In case of certain minerals where data for any particular year was not available it has been estimated on the basis of production during the last year. The figures given in this table represent the daily labour employed both above-ground and under-ground.

Rajasthan Government Employees.—The Directorate of Economics and Statistics is conducting a regular census of Rajasthan Government Employees on half-yearly basis. The first census was conducted for the employees as on 31-12-56. The data is collected separately for gazetted and non-gazetted staff under various pay ranges. The non-gazetted staff has been further sub-divided into permanent, temporary and part-time, piece rate etc. while the gazetted staff has been sub-divided into permanent and temporary. The data in the prescribed form is supplied by the Drawing and Disbursing Officers to the respective Heads of the Departments and they in turn compiled the data for their Department and pass on the the Directorate of Economics and Statistics for compilation at State level. Employment represents the actuals as on the date of census while the monthly emoluments are estimated by multiplying the total employees with the value of the respective ranges.

Employment Exchanges.—Statistics under this section show the working of the employment exchanges in Rajasthan. The nature of works undertaken by the employment exchanges consists of registering people who are seeking employment and securing employment for them. The data is supplied regularly by the Directorate of Employment Rajasthan.

#### TRANSPORT AND COMMUNICATION

Roads.—The data contained in the table relates to the roads maintained by Public Works Department only and does not include roads maintained by local bodies and others. They also include national highways though they are under the direct control of the C.P.W.D., Government of India.

Transport.—Data on Motor Vehicles and Road Accidents is collected directly by the Directorate of Economics and Statistics, Rajasthan from the Office of the Director of Transport and Superintendent of Police C. J. D. Rajasthan respectively. Motor Vehicles on road represent all vehicles actually plying, while the new registrations are given under the head "Motor vehicles registration".

Posts and Telegraphs.—This section presents data relating to the different branches of the Post and Telegraph Department and are supplied by the Directorate of Posts and Telegraphs, Rajasthan Circle.

#### Education

This section presents data on Literacy as available from the 1961 census and other educational statistics are supplied by the Director of Primary and Secondary Education, Rajasthan, who in turn, collects from the educational institutions of all standards for submission to the Ministry of Education, Government of India, in form 'A'. The data on examination results is based on the information supplied by the University of Rajasthan, Board of Higher Secondary Education, Rajasthan and the Directorate of Primary and Secondary Education, Rajasthan for the portions covered by them. For the purpose of these tables all statistics refer to recognised institutions only except for primary schools where unrecognised institutions have also been included.

Literate and Educated persons:—A Literate person has been defined as one who can both read and write while an Educated person can both read and write and has also passed a written examination or examinations as proof of an educational standard attained.

Schools/Colleges for Agriculture, Commerce, Engineering, Law, Medicine, Physical Education, Teachers' Training, Veterinary Science etc. come under *Professional education* while those for Music, Dancing, Fine Arts, Oriental Studies, Social Education etc., under *Special education*. All other types of studies come under general education. Co-educational institutions are covered under institutions for boys.

Scholar means a student admitted and getting education in any of the above referred institutions as regular student on roll as on the 31st March of the reporting year.

Teacher means a whole time person appointed by the management for Teaching and on staff as on the 31st March of the reporting year.

 $E_{xpenditure}$  means the amount actually spent on education including recurring and non-recurring charges up to 31st March, of the reporting year. Indirect expenditure represents the amount incurred on direction, buildings, furniture, scholarships and other miscellaneous items. Its nature is such that it can not be apportioned to each type of institution.

Examination results relate to those students who were educated in any of the above referred institutions during the reporting year as well as those appeared as private candidates. The data in respect of candidates passed is inlousive of supplementary examination results.

Note:-Co-educational institutions are covered under boys.

#### MEDICAL AND HEALTH

1. Government Medical Institutions.—The distinction between a hospital and a dispensary has been made on the basis of provision of in-patient beds. A Hospital has beds whereas a dispensary has none. Accordingly T. B. clinics without beds have been grouped under dispensaries. The term general hospital here signify those hospitals where patients of all nature may find treatment and as such the Zanana Hospitals have been grouped under general hospitals.

The Primary Health Centre is a composite institution providing facilities of in-door and out-door treatment, maternity and preventive health work. The information contained in this issue relates to those primary health centres which are actually functioning at the end of the year.

- 2. In-patient Beds.—The classification of in-patient beds is made according to the diseases. As such the general beds here signify all those beds, which are not meant for any particular disease and, therefore, includes the beds available in primary health centres as well. The beds shown under 'maternity' head includes beds available in State run maternity and child welfare centres.
- 3. Medical and Health Personnel.—The number of medical personnel is based on the sanctioned strength of State public hospitals, dispensaries, primary health centres, family planning centres, maternity and child welfare centres, clinics, health workers etc.
- 4. Patients treated.—The increase in number of patients treated from year to year reflect the increased number of patients who came to state run medical institutions, instead of remaining without treatment or going to private practitioners. Patients classified by diseases do not tally with the total patients treated, due to administrative difficulties in registration—system at different stages.
- 5. Registered Deaths by causes.—The data is based on the reports received from health staff by the Directorate of Medical and Health Services, Rajasthan. Cent-per-cent cases of deaths occurring in remote areas are not reported to the local health authorities, consequently there is omission to this extent. The fluctuations in the number of deaths may perhaps be due to better reporting in some of the years.
- 6. Birth and Death rates and Infant and Maternal mortality rates.—The birth and death rates relate to towns having mid years estimated population of 30,000 and above. The rates have been worked out per 1000 of population. In case of infant and maternal mortality rates the registration area is changing from year to year and as such the actual number of towns and tehsils under registration area for each year has been given. The infant mortality and maternal mortality rates were calculated on 1000 live birth and 1000 total births (including still births) respectively. The birth and death rates and infant and maternal mortality rates are showing fluctuations from year to year due mainly to the defect in registration. There was to a certain extent under registration as well as mis-registration.

The statistics in respect of modern medicine and birth and death rates and infant and maternal mortality rates have been made available by the Director of Medical and Health Services, Rajasthan and in respect of Ayurvedic and Unani system by the Director of Ayurved, Rajasthan.

#### HOUSING

In Rajasthan, 5 types of housing schemes viz. (i) Low income group housing (ii) Middle group housing (iii) Subsidised industrial housing (iv) Rural housing and (v) Slum clearance and sweepers' housing are in operation. Of these, information relating to first three categories are presented in table No. 21.1

Low Income Group Housing.—This is a plan scheme and is controlled by the Local Self-Government Department (now known as Town Planning Department), Government of Rajasthan. Under this scheme loans up to Rs. 8,000/- are disbursed by the Collectors to the persons having an annual income up to Rs. 6,000/- for the construction of residential buildings. The loanee has to contribute atleast 20 per cent of the cost of construction. During the year 1957-58 the scheme was in operation at Ajmer, Alwar, Bharatpur, Bhilwara, Bikaner, Chittorgarh, Dungarpur, Ganganagar, Jaipur Jodhyur, Kota, Nagaur, Pali, Sikar and Udaipur district head-quarters while since 1958-59 it is in operation at all the district head-quarters.

Middle Income Group Housing.—This is a non-plan scheme and is also controlled by the Local Self-Government Department (now known as Town Planning Department), Government of Rajasthan. Under this scheme, loans up to Rs. 16,000/- (Rs. 20,000/- in case of those who do not possess a plot of land) are disbursed by the Collectors to the persons having an annual income between Rs. 6,000/- to Rs. 12,000/- for residential buildings at District head-quarters except Bun Chittorgath, Churu, Dungarpi., Jaisalmer, Jhalawar, Sikar and Tonk. During the year 1961-62 while Jhalawar was newly covered, no loans were disbursed at Jalore, Nagaur and Sirohi.

Subsidised Industrial Housing.—This is a plan scheme for the benefit of industrial workers and is being controlled by the Labour Commissioner, Rajasthan and executed by the Public Works Department (Buildings & Roads). The scheme was in operation at Bhilwara, Jaipur and Pali town during 1957-58. It was extended to Ganganagar in 1958-59. To Zawar mines (Udaipur), Beawar, Sawai-Madhopur (Private Sector) and Alwar (Private Sector) in 1960-61 & to Kora in 1961-62.

#### PLANNING AND DEVELOPMENT

First and Second Five Year Plans:—The data given in Table No. 22.1 was collected by the Directorate of Economics and Statistics Rajasthan, from the Plan authorities. The expenditure reported in this table is only that spent against State Plan ceilings. The arrangement of sectors in the table has been made according to the classification indicated then by the Planning Commission. While all other sectors are self explanatory the sub-sector 'others' represents only administrative buildings at Ajmer and Jodhpur.

The data relates to the Reorganised Rajasthan as if it existed since the beginning of the First Five Year Plan. The data relating to First Five Year Plan was collected towards the end of the First Plan period while the data relating to Second Five Year Plan was collected on monthly, quarterly and annual basis. The monthly data is processed to arrive at quarterly figure which is perfected by quarterly returns. Likewise the quarterly data is compiled to yield Annual data and is perfected by the annual returns. The yearly figures are also reconciled every year and only latest reconciled figures as far as possible are released.

Third Five Year Plan:—The arrangement of sectors during the Third Five Year Plan has been some what different than that adopted during First two Plans and is more exhaustive. As in the case of Second Plan, the data for the Year 1961-62 has also been collected from the various plan executing authorities on monthly, quarterly and annual basis and processed in the Directorate of Economics & Statistics. The figures of expenditure presented here were final till the end of Sept., 1932, and subsequent changes if any would be reported in the next issue.

The scheme-wise details of allotment & expenditure and physical targets and achievements for the year 1961-62 are given in Table No. 22.4 and 22.5 respectively. The district-wise expenditure, given in Table No. 22.3 presents the break up of total expenditure in the State in three categories viz., (A) Schemes operating in districts (B) Head-quarter schemes and (C) Others Category (A) includes schemes that are operated in the districts. In case where a particular scheme which is beneficial to more than one district, the apportionment of the expenditure to individual district is based on the proportion of benefit devised by each district therefrom. Cases where the scheme is beneficial to the State as a whole like technical institutions are classified in this category and the expenditure is shown in the district where the institute is located. Expenditure under category 'B' generally covers provision of staff at Headquarters for supervision and implementation of various plan schemes. Expenditure incurred on tools and plants which can not be appropriated to individual schemes is also included under this category. Under category 'C' is included the expenditure on schemes for which districtwise breakup is neither available nor can be worked out for want of basis for apportionment.

Community Development.—The Block is treated as a unit of administration for the purpose of Planning and Development. According to the stage of development the blocks have been divided into following three categories:—

- (i) Pre-extension.—Block which is declared as such as a forerunner to the intensive phase of development. Its life is generally one year.
- (ii) First Stage.—Block declared as such after completion of Pre-extension stage for intensive development. It works for 5 years subject to further extension.

(iii) Second Stage.—Block declared as such after it has completed its operational period of intensive development. Its life is 5 years.

In table No. 22.6 year of opening, stage of blocks as at the end of 1962, villages covered and their area and rural populations served by each block] has been given, while table No. 22.7 gives the principal physical achievements of the blocks functioning at the end of the financial year. The physical achievements represent the physical output within the block area and are not necessarily the results of financial inputs made out of the C. D. funds only.

#### GENERAL HLECTIONS

In Rajasthan, under the terms of the Indian Constitution, only the Vidhan Sabha with 176 directly elected members constitutes State Legislature. 22 members are also directly elected from Rajasthan to Lok Sabha and 10 members are sent to Rajya Sabha as elected representatives of the State Vidhan Sabha.

In the following tables an attempt has been made to bring out broadly the salient characteristics of the electorate in the State, during the 1962 general elections. For this, the number of electorate, constituencies, seats allotted, voteds polled and preferences of voting to each recognised party for the purpose of representation in the Vidhan Sabha and Lok Sabha have been given.

The election to the Vidhan Sabha and Lok Sabha was held on the basis of Adult sufferage, that is every person who is a citizen of India and has attained the age of 21 years, if not otherwise disqualified, is entitled to be a voter at any such election. During the Third General Elections there were 176 constituencies and all were single member constituencies unlike that of Second General Elections when there were 136 Assembly constituencies including 40 double member constituencies. Similarly for the Lok Sabha all the 22 parliamentary constituencies were single member constituencies during the Third General Elections whereas during the Second General Elections there were 18 parliamentary constituencies including 4 double member constituencies. Special feature about the Third General Elections was that the marking system of parties was introduced in place of Balloting system of voting. The percentage of polling indicates the extent to which the voters exercised their franchise.

Tables on voting by sex, electoral strength of various parties and swing in political opinion have been also added.

The data contained in these tables has been compiled in the Directorate from the records of the Election Department Government of Rajasthan, and has been revised in the current—year, as per latest data made available by Election Department.

सन्धमव जयत
